Policies & Procedures Manual for the
Joint UAF-UAA Ph.D. Program in Clinical-Community Psychology
November 2016

PREAMBLE

This document reflects general policies and procedures for the Joint UAF-UAA Ph.D. Program in Clinical-Community Psychology as adopted by program faculty and administration. The document is a living document; changes and modifications may be required and will vetted by the faculty and administration. On rare occasions, exceptions to policies will be made in the cases of extenuating circumstances which will start at the lowest administrative level possible (i.e., faculty vote and recommendation). The date of the General Policy & Procedure document will always reflect the most recent update.

Abbreviations used: PD = Program Director; PC = Program Coordinator;

I. Program Governance - Program governance is accomplished at three levels: Program Directors, program committees and by program faculty.

A. Program Directors - there is a PD at each site of the joint program. All PD level decision are made jointly

1. Functions of PD
PDs deal with all of the following issues with the noted committees OR as needed in collaboration with their Department Heads:
   a. Moderate program faculty meetings
   b. Convene Admissions, Competencies, and other committees as needed
   c. Address curriculum issues with input from the Curriculum Committee
   d. Resolve programmatic issues with input from the Governance Committee
   e. Address core faculty issues, with Department Heads as needed
   f. Engage in problem solving with students regarding progress in the program in collaboration with student advisors
   g. Work in collaboration with Department Heads on teaching assignments for core and associated doctoral faculty
   h. Work in collaboration with Department Heads on course scheduling
   i. Initiation of approval of non-core faculty to serve as dissertation chairs or exceptional committee members with input from core faculty

1a. PD Qualifications
The PD or PD candidate meets all of the following qualifications: core faculty member, doctoral degree in clinical or counseling psychology from a regionally accredited university, tripartite, tenured or tenure track, licensed or license eligible.

2. Term
The PD terms will last for three years before the appointment process is repeated. If the PD does not appropriately execute the duties and responsibilities, the program faculty by means of a majority vote, may appeal to the dean to call for a new appointment process at any time. The PD(s) will be 12-month .5 FTE positions recommended by faculty and appointed by the Dean(s). There are no limits on how many terms a PD(s) may serve.

3. Selection of new PD(s)
   a. Core faculty will vote (by secret ballot if desired). More than one candidate name may be forwarded to the dean, and if there is more than one, faculty may indicate the strengths and weaknesses of each candidate.
   b. When a qualified PD candidate(s) have been provisionally selected by core faculty that recommendation will be forwarded to Department Head(s) (Director at UAA and Chair at UAF).
   c. After consultation with the Department Heads, the Dean(s) will make the final selection and appointment. However, if the Dean does not choose to appoint the candidate(s) recommended by the faculty, he or she will request that the faculty recommend different candidate(s).
   d. If there is no qualified candidate within the faculty, the Dean(s) of the college(s) will initiate the selection process for a new PD in consultation with the core faculty. The
Dean will appoint a one year interim PD or support the PD from the distal campus serving as the interim PD during the selection process.

4. Reporting lines between levels of administration
   a. The PD(s) report to the Psychology Department Director at UAA and the Dean of the College of Liberal Arts at UAF.
   b. The Dean or Dean’s Designee communicates with Deans, Provosts, Chancellors, and other administrators as appropriate.
   c. All communications about the program will be discussed with the PDs and Department Heads (Director at UAA and Chair at UAF) before substantial program decisions are made.
   d. In the case of disagreement, the Conflict Resolution section below (See page 9) will be followed.

5. New administration involved with the program will be oriented by the PD to the joint nature of the program, training mission, and Policies and Procedures as they pertain to joint administrative involvement. Particular attention will be given to orienting new administrators to typical situations requiring cross campus collaboration.

B. Program Committees
   1. Roles and Responsibilities
      Committees conduct discussions, make recommendations, and provide draft documents to the faculty for review and ratification. While PDs serve on most committees, the PDs rely on the conveners of committees to move those committees forward.
   2. Procedures for feedback from Committees
      a. Committees will have regular place on faculty meeting agendas and faculty retreats.
      b. Committees may present ideas for discussion or proposals for review by the faculty in faculty meetings and retreats.
      c. Program modification proposals will go through a formal review by the faculty and, as appropriate, administration of the program.
      d. All faculty will be asked to vote on proposals.
   3. List of Committees
      Admissions The admissions committee consists of the PD(s), three faculty members, and at least one student representative. The committee always will have representation from ANCAP and the PC(s) participate in all meetings.
      Competencies Membership of faculty members other than the PD will rotate; based on expertise, two faculty members will be assigned per portfolio by the PD. If needed a third reviewer for the portfolio will provide a review if there is a disagreement between the two original raters.
      Culture Committee Committee invites the PD(s) to attend all meetings; the committee will have at least two faculty members and at least one student representative.
      Governance Membership includes the PD(s) and Department Head(s). Membership of other members is rotating, with at least two faculty members. The Governance Committee is convened when substantial student issues require it.
      Outcomes/curriculum Outcomes and curriculum will always have the same members and will include the PD(s); the committee will have at least two faculty members and at least one student representative.
      • The committee will seek feedback from faculty, students, alumni, and stakeholders regarding curriculum content, scope, and applicability to professional practice in Clinical-Community Psychology with a rural indigenous emphasis.
      • Regarding program maintenance and improvement the committee will seek feedback from Program
Internship Committee Committee will always include the PD(s) and at least one faculty member.

C. Program Faculty

1. Faculty Responsibilities

Faculty members are responsible for knowing and abiding by the information contained in this document and the Ph.D. Student Handbook. An annual review of this document and Student Handbook will be conducted with all faculty members. Any requests for an exception to P&P should be brought to the full faculty for consideration prior to action. Any unapproved departure will be addressed by means of the Conflict Resolution procedure as noted below. Pursuant to AS 14.20.370 and contained in 20 AAC 10.020, faculty are obligated to abide by the code of ethics and the professional teaching standards adopted by the Professional Teaching Practices Commission. In addition, faculty will abide by the Code of Ethics of the American Psychological Association.

NOTE: The most current version of the student handbook is available on the program website at http://psyphd.alaska.edu. The material in the handbook reflects all student-related policies and procedures as decided upon by program faculty in various meetings and retreats; this student-related policy information is not repeated in this P&P Manual.

2. Faculty Decision Making

Faculty members will vote in faculty meetings or by email on program matters that are not otherwise addressed by PDs. Decisions are made by majority vote of all core and associated faculty members. A quorum consists of greater than 50% of faculty members.

3. Faculty Designations

a. Core Doctoral Faculty

50% or more of faculty time is spent in the Ph.D. program AND the faculty member is engaged in two of the following types of doctoral education: research, teaching doctoral courses, clinical supervision, mentoring students, supervising research, chairing a dissertation) AND the faculty member’s degree is in the substantive area(s) of professional psychology in which the program provides training AND the faculty member supports the program mission and integrates it in all aspects of her or his work (including teaching, research, service, and practice)

b. Associated Program Faculty

Faculty members contribute regularly and significantly through two or more doctoral activities BUT do not have a 50% time commitment OR do not have a degree in community, clinical, or counseling psychology.

c. Other Contributors

Faculty members contribute one type of doctoral activity only and generally only contribute occasionally.

In order to seek approval for a Non-Core Faculty or Exceptional Committee member to serve as a dissertation chair, the student must follow the approval process as detailed in the Student Handbook. This person must be approved as dissertation chair by the PD(s) (in consultation with the core faculty as needed) before work on the dissertation can begin.

4. Change in Faculty Status

Faculty designations are fluid and can change over time to reflect that faculty may change their level of involvement in the Ph.D. program (either increased or decreased). All changes in faculty status will be communicated to and considered by both PDs and both campus’ Department Heads and Administrators before a decision is made by the appropriate campus administrator (the College of Liberal Arts Dean at UAF and the College of Arts and Sciences at UAA).
5. Syllabi
   a. Culture, Rural Setting, Social Advocacy and Indigenous Populations
      All syllabi need to include readings and assignments specifically related to culture, rural
      settings, social advocacy, and Indigenous populations. Required courses identified as not
      needing to contain content relating to social advocacy are Multicultural Psychopathology,
      Intervention II, Test & Measurements, Qualitative Analysis, Quantitative Analysis, and
      Assessment I. This requirement will be shared with all Ph.D. faculty, including non-core
      faculty and adjuncts.
   b. New Faculty & Adjuncts
      New faculty and adjuncts teaching any Ph.D. course for the first time are required to send
      their syllabus to the PD(s) at least 10 days before the start of the semester to ensure that
      the syllabus conforms to the Ph.D. standards.
   c. Clinical Practica Syllabi
      In order to ensure uniformity across clinical training experiences at both campuses PD(s)
      will review and approve any requests for substantive changes to clinical practicum
      syllabi.

Core elements that must be included in ALL PSY 652 Syllabi are:

**Course Description:** Use verbatim: “This course provides a supervised, clinical
practicum experience in evidence-based or empirically supported psychological
assessments and interventions. It is an applied techniques course focusing on
psychotherapy issues and problems encountered in the general psychotherapy setting.
Students gain supervised experience in the process of psychotherapy with particular focus
placed on cultural diversity. Emphasis will be on developing “foundational clinical skills”
which include developing therapeutic relationships with clients from diverse cultural
and ethnic backgrounds, assessing for psychological disorders, developing meaningful
planning treatment plans that are informed by the empirical literature, providing evidence-based or
empirically supported psychotherapeutic interventions, and making appropriate referrals.

**Course Objectives:**
1) Provide students with the opportunity to develop and demonstrate ethical and
   professional competence in a psychological services setting.
2) Provide opportunity for students to develop and practice the skill of providing
   research-based psychotherapy, all of which will be under close supervision.
3) Provide opportunity for students to develop and practice diagnostic and treatment
   planning skills.
4) Develop professional communication skills including maintenance of records, report
   writing, staff consultation, client services, staffing cases, inter-agency
   communication, and making referrals.
5) Provide an environment in which students can explore the role of culture, gender,
   age, socioeconomic status and other characteristics of the client and the therapist in
   the therapeutic process.
6) Provide opportunity for students to learn procedural skills relevant to developing,
   maintaining and working in professional psychological-services settings.

**Outcome Competencies:** Further develop:
1) Personal and interpersonal skills including establishing rapport, listening, problem-
   solving, affect tolerance, professional demeanor, ability to express oneself verbally
   and in writing, and ability to reflect on self and one’s impact on others.
2) Awareness and knowledge of psychotherapeutic approaches based on theory and
   research.
3) A “therapeutic worldview”, which consists of a clear statement about how the
   student conceptualizes therapeutic change and theories the student uses to inform her
   or his beginning model.
4) Ability to use supervision in a productive and professional manner.
5) Ability to conceptualize psychological problems consistent with theory and empirical research.
6) Ability to practice in a manner consistent with legal and ethical standards.
7) Sensitivity to diversity issues in the area of psychological practice.

**Additional Competencies:** Over the course of the semester, students will make progress toward:
1) Improving communication skills with clients, colleagues, and supervisors,
2) Application of knowledge gained from research to the psychological services setting,
3) Improved use of assessment,
4) Improving professional collaborations including use of supervision and case consultation,
5) Increasing awareness of issues of diversity including individual and cultural difference,
6) Increased ability in leadership particularly around establishing and maintaining the clinical work setting, and
7) Reinforcing personal skills required to maintaining an effective clinical practice.

**Therapeutic Model / Worldview:** One of the goals for students enrolled in their first year of practicum is to develop a “beginning therapeutic model”. We all have assumptions about how clients come to have the problems that they experience as well as some idea about how people improve in therapy. It is vital for new psychologists to be able to explicitly discuss their working models, particularly as they relate to treatment planning and psychological interventions. We will discuss working models during individual and group supervision throughout the semester with a view towards the student being able to answer the following questions:

1) How do you believe clients change or otherwise improve in psychotherapy?
2) What are the main techniques that you use to help facilitate client improvement?
3) What empirically supported theories and therapies do you utilize in your sessions?
4) What are your personal strengths and limitations in relation to providing this type of psychotherapeutic service?
5) How do you personally integrate culture into your work as a psychologist?

**Prerequisites:** Admission to the Ph.D. Program in Clinical-Community Psychology; PSY 623 & 629 Intervention I & II, PSY 611 Ethics; PSY 622 Multicultural Psychopathology

**Supervision:**
- 1 hour scheduled individual supervision weekly. [NOTE: This is required regardless of the number of credits (i.e., 1, 2 or 3) for which the student has registered.]
- 2 hours of scheduled group supervision weekly.
- Specific instructions for seeking on-call, ad hoc clinical supervision as clinically indicated (e.g., suicidality, psychotic behavior, acute intoxication.)
- Expectation that students come to supervision prepared.
- Supervision must include direct observation (live or recorded) of the practicum student providing clinical services.
Evaluation:

- Use of Clinical Practicum Evaluation Form (revised July 1, 2016) found at http://psyphd.alaska.edu/currentstudents.htm.

**Hours Required:** Students are *expected* to accrue 75 practicum hours per credit of Clinical Practicum I (PSY 652) – 75 hours for one credit, 150 hours for two credits, and 225 hours for three credits. Hours can include time for screenings, intakes, therapy, record keeping, supervision, consultation, treatment planning, case preparation and research, and clinic administration. (NOTE: This element states “expected” rather than “required.” This allows reasonable flexibility with the supervisor determining when the student has sufficiently satisfied the practicum requirements without having the student yoked to the 75 hours per credit as a requirement for assigning a letter grade. Remember, the student ultimately must accrue 600 supervised client contact hours in partial fulfillment of the clinical portfolio requirements). A minimum of 40% of practicum hours must be spent in direct client contact.

**Documentation of Hours:** Students must document all of their practicum experiences. The APPIC-approved software “Time2Track” is strongly recommended, but a similar system for documentation of the student’s clinical contact record is acceptable. Separate documentation is required for each practicum placement and weekly reports must be signed by both practicum student and practicum supervisor(s). The weekly reports will be submitted at the 7th and 15th week of the semester for instructor review. Students are encouraged to keep copies of these documents for preparing their clinical portfolio, pre-doctoral internship application, and licensure application.

**Ethical Behavior:** You are expected to conduct yourself in an ethical manner in all professional activities. All students in the Clinical-Community Psychology Ph.D. Program are bound by the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct. Breach of any of these guidelines may result in immediate suspension from practicum and, pending review, possible expulsion from the program.

~ ADDITIONAL ELEMENTS FACULTY MAY INCLUDE ~

NOTE: While clinical faculty members are required to include the above core elements in PSY 652 syllabi, they are free to add elements. Such additional elements include but are not limited to:

- **Required** texts or other training resources. (Note: It is assumed that students will have access to and utilize DSM 5 and the APA Ethical Principles of Psychologists and Code of Conduct.)

- Supervision Contract.

- Additional individual supervision time if and as deemed necessary to help the student meet practicum training objectives.

**Core elements that must be included in ALL PSY 653 Syllabi are:**

**Course Description:** Use verbatim: “This course provides advanced clinical practicum experience to apply theory further to practice and improve skills as a clinician. Covers application of psychological assessment principles. Impact of cultural factors continues as a major aspect of the practicum experience. Additionally, while the focus is on developing clinical competencies, the student is also encouraged to seek/cultivate social advocacy opportunities to serve their clients (e.g., training and empowering clients to become assertive, well-informed consumers of healthcare services from other providers.) Practicum students are assigned to placements by the practicum coordinator based on each student’s professional interests, prior clinical experiences, and availability of practicum slots and supervisors.
**Course Objectives:** Gain opportunity to build upon clinical skills gained through PSY 652 Practicum Placement – Clinical I.

1. Learn how to integrate psychological assessment into the psychotherapy process.
2. Refine professional communication skills, including report writing, referrals, intakes, staffing cases, and case presentations.
3. Understand the role of culture, gender, age, socioeconomic status, and other client characteristics that may affect the psychotherapy relationship.
4. Gain further opportunity to practice psychotherapy skills under close supervision.
5. Gain further opportunity to demonstrate ethical and professional behavior in a psychotherapy setting.
6. Develop social advocacy competencies for serving clients.
7. Learn advanced methods for maintaining personal well-being through constructive self-care procedures.
8. (NOTE: The clinical supervisor at the practicum site may add objectives.)

**Prerequisites:** Admission to the Ph.D. Program in Clinical-Community Psychology; PSY 652 Practicum Placement-Clinical I.

**Supervision:**

- 1 hour scheduled individual supervision weekly. [NOTE: This is required regardless of the number of credits (i.e., 1, 2 or 3) for which the student has registered.]
- 2 hours of scheduled group supervision weekly.
- Specific instructions for seeking on-call, ad hoc clinical supervision as clinically indicated (e.g., suicidality, psychotic behavior, acute intoxication)
- Expectation that students come to supervision prepared.
- Supervision must include direct observation (live or recorded) of the practicum student providing clinical services.
- **Group Supervision at the Practicum Site:** A minimum of one hour per week of group supervision at the practicum site is required. This group supervision requirement may be met through case staffings, group supervision, or any other group session in which clinicians discuss their clients and the clinical services they are providing. The primary issue is that each student must have a group experience with other professionals at their practicum placement with the focus of the experience being the improvement of clinical and professional skills.
- **Group Supervision at the University:** In addition to the group supervision at the practicum site, practicum students will also participate in a two-hour, bi-weekly group supervision session at their respective campus led by clinical faculty in the program.
- At the practicum setting, students are encouraged to seek out appropriate opportunities to provide clinical supervision under the supervision of their on-site clinical supervisor.

**Evaluation:** Use of Clinical Practicum Evaluation Form (revised July 1, 2016) found at [http://psyphd.alaska.edu/currentstudents.htm](http://psyphd.alaska.edu/currentstudents.htm).

**Hours Required:** Students are expected to accrue 75 practicum hours per credit of Clinical Practicum II (PSY 653) – 75 hours for one credit, 150 hours for two credits, and 225 hours for three credits. Hours can include time for screenings, intakes, therapy,
record keeping, supervision, consultation, treatment planning, case preparation and research, and administration of the clinic. (NOTE: this element states “expected” rather than “required.” This allows reasonable flexibility with the supervisor determining when the student has sufficiently satisfied the practicum requirements without having the student yoked to the 75 hours per credit as a requirement for assigning a letter grade. Remember, the student must ultimately accrue 600 supervised client contact hours in partial fulfillment of the clinical portfolio requirements). A minimum of 40% of practicum hours must be spent in direct client contact.

**Documentation of Hours:** Students must document all of their practicum experiences. The APPIC-approved software “Time2Track” is strongly recommended, but a similar system for documentation of the student’s clinical contact record is acceptable. Separate documentation is required for each practicum placement and weekly reports must be signed by both practicum student and practicum supervisor(s). All documents must also be reviewed and cosigned by the PSY 653 practicum coordinator. Students are encouraged to keep copies of these documents for preparing their clinical portfolio, pre-doctoral internship application, and licensure application.

**Ethical Behavior:** You are expected to conduct yourself in an ethical manner in all professional activities. All students in the Clinical-Community Psychology Ph.D. Program are bound by the American Psychological Association's Ethical Principles of Psychologists and Code of Conduct. Breach of any of these guidelines may result in immediate suspension from practicum and, pending review, possible expulsion from the program.

~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

**ADDITIONAL ELEMENTS FACULTY MAY INCLUDE**

NOTE: While clinical faculty members are required to include the above core elements in PSY 653 syllabi, they are free to add elements. Such additional elements include but are not limited to:

- **Required** texts or other training resources. (Note 1: it is assumed that students will have access to and utilize DSM 5 and the APA Ethical Principles of Psychologists and Code of Conduct.) (Note 2: Readings may be assigned by the on-site practicum supervisor(s) based on the clinical and professional issues with which each practicum student faces by virtue of the training site and clientele.

- Supervision Contract.

- Additional individual supervision time if and as deemed necessary to help the student meet practicum training objectives.

6. Faculty Workload
   Both PDs and Department Heads will work collaboratively on faculty workloads to ensure that they meet the academic and training needs of the Joint Ph.D. program. If there is disagreement, Conflict Resolution procedures are followed as noted below.

II. **Coordination of Student Training with Internal and External Practicum Sites**

A. Internal Training Clinics
   PD(s) will meet annually and as needed with the Training Clinic Director(s) to ensure students have opportunities to secure the necessary training experiences to complete practica, clinical research opportunities, and clinical portfolio requirements. The PD(s) and Training Clinic Director(s) will collaborate with one another and the clinical faculty, who provide supervision and assessment training to students seeing clients in the Training Clinics, to maximize quality training opportunities for students. The student's clinical supervisor serves as the initial point of contact for problems or concerns that arise between the student supervisee and other students, staff, and/or faculty working in the clinic. If concerns arise that cannot be resolved at this level, the Training Clinic Director(s) should be notified and work toward resolving the concern. Should the issue persist, the conflict resolution or grievance process should be enacted beginning with the student supervisee's advisor and the PD(s). The process should proceed as described in the Student Handbook.
B. External Training Sites

The PDs are responsible for establishing training agreements between the program, agency and the university. Then, the PDs work in conjunction with students, instructors of record and external training sites to facilitate practicum experiences. Practicum placements are handled differently for clinical and community practicum in order to develop the student’s professional identity as a clinical psychologist and as a community psychologist. When students seek community practicum, they are more active in creating contacts and seeking out placements for themselves. When students seek clinical practicum, they go through a more formal process by applying for placement at sites after securing approval from their clinical supervisor for PSY 652 and the same campus PD.

The instructor of record will maintain active relationships with the External Training Supervisors to ensure students’ training experiences meet program requirements. Students are expected to resolve conflict at the lowest level possible with their onsite supervisor. If this is not possible, the instructor of record serves as the initial point of contact for problems or concerns that arise between the student and the onsite supervisor in the external training site.

If the conflict pertains to student performance or conduct, the student will be provided with immediate written feedback via the Practicum Evaluation Form (Clinical or Community). If necessary, a remediation plan will be developed and implemented by the instructor of record, in consultation with the PD(s) and external training supervisor. Should the issue persist, the conflict resolution or grievance process will be enacted beginning with the student supervisee's advisor and the PD(s). The process will proceed as described in the Student Handbook.

If the conflict pertains to external supervisor performance or conduct, the student will report the matter to the instructor of record. The instructor of record works with the student and onsite supervisor to try and resolve the issue informally. If this cannot be resolved informally, the program’s formal policies will be invoked based on the nature of the concern. Additionally, the program acknowledges and respects the policies and procedures of the external agency. The student is required to adhere to both agency and program requirements, policies and procedures.

III. Conflict Resolution

1. Complaints and Grievances about Doctoral Student

Reports (by faculty, staff, or peers) of students exhibiting unprofessional behavior will be brought to the attention of their advisor or PD and a meeting will be arranged. If the issue cannot be resolved at that level, the advisor or PD will review the Student Impairment and Incompetence Policy in the Student Handbook with the student and follow the procedures contained therein.

2. Doctoral Student Complaints and Grievances Involving Doctoral Faculty*

Student reports of faculty exhibiting unprofessional behavior or other concerns will be brought to the attention of that faculty member. The first step is to try to resolve the issue informally; this can be done by the student directly addressing it with the faculty member in question or by the student’s PD addressing it with the faculty member. If this matter cannot be resolved informally the University’s formal policy will be invoked. The links for these policies are below:

https://www.uaa.alaska.edu/deanofstudents/student-complaint-dispute/index.cfm
http://www.uaf.edu/catalog/current/academics/regs3.html

* See P&P for faculty designations (core, associated, other contributors)

Both UAF and UAA policies require that Department Heads (Director or Chair) must be involved in formal conflict resolution with students. The doctoral program adheres to this requirement. When doctoral students and doctoral faculty are involved in a grievable or conflict situation, the Department Head will seek the input and assistance of the Ph.D. Governance Committee. The Ph.D. Governance Committee consists of both PDs, Department Heads, and one faculty member per campus. The PDs will collaborate with the Department Head to seek resolution. All formal paperwork will be completed by the Department Head and will be copied to the PD.

3. Conflicts between the PD and Department Head (Director or Chair)

Conflicts between the PD and Department Heads are resolved at the lowest administrative level possible. If they cannot work out the conflict alone, then the other campus’s PD and Department
Head will meet with them to mediate and assist. If it cannot be resolved there, the conflict will be taken to both college Deans. If the conflict cannot be resolved at the college Dean’s level, the conflict will be taken to both Provosts, then both Chancellors, and then the University President.

4. Conflicts between Faculty Members

Conflicts between faculty members are resolved at the lowest administrative level possible. If the faculty members cannot work out the conflict, they will meet with the PDs to mediate and assist. If they cannot work out the conflict, the faculty and PDs will meet with both Department Heads to mediate and assist. If the conflict cannot be resolved there, it will be taken to both college Deans. If the conflict cannot be resolved at the college Dean’s level, the conflict will be taken to both Provosts, then both Chancellors, and then the University President.

IV. Student Admissions

A. Confidentiality

All admissions materials and discussions must be kept strictly confidential. Written materials need to be stored in a secure location and can be shared only with other core and contributing faculty members of the joint program.

B. Faculty Involvement in Issues related to the Admissions Process

All core faculty will be involved in difficult issues that come up during the admissions process as deemed appropriate by the admissions committee. This can be facilitated by broadly identifying issues by e-mail, setting up impromptu meetings as needed, and having more frequent joint faculty meetings.

C. Student Involvement in Issues related to the Admissions Process

Student representatives, (third year or higher) will not have access to applicant files but will participate during the on-site interviews, will gather their respective student body input on the candidate, and will have a prorated 1 vote (faculty will have 1.5 weighted vote) on the admissions selection of the candidates.

D. Recruitment - All recruitment materials will be posted on the website (as feasible and possible). Recruitment materials will include current status of the program, detailed description of the academic requirements and expectations of the program; Student Admissions, Outcomes and Other Data (as required by APA); policies and procedures; student handbook; directions for applying; and contact information for question.

E. Guidelines for Applicant Evaluation Process

1. Overview of the Review Process

All applications will receive a preliminary review by the PC(s) and will be prescreened based on criteria including GPA, appropriate degree and course work, letter of intent, professional vita, and letters of recommendation.

Individual and complete reviews will need to be conducted (using the Screening and Comprehensive Rating Forms) to determine the top candidates in the pool. All rating and screening forms need to be given to the Program Coordinator(s) for filing. The Program Coordinator will type all ratings and screening numbers into an Excel spreadsheet. The admissions committee will then meet to produce the final candidate rankings, taking into consideration match with program mission and faculty research interests.

Once this final ranking has been accomplished, up to two times the number of planned admissions will be invited for an in-person interview. Once interviews have been completed and applicants have been rated for interview performance by all admissions committee members (using the Interview Rating Form), a final applicant ranking is accomplished based on all ratings and information from all sources. This is done via the same process used to rank applicants before making interview invitations. Once this ranking has been completed, the top applicants will be offered admission and the other applicants will be placed on a waiting list.

2. Guiding Principles for All Faculty Rating Applicants

The following guiding principles must be implemented by all admissions committee members (i.e., faculty members rating applications during a given application cycle):
a. GPAs need to be evaluated in the context of the institution granting the degree (e.g., Ivy League University versus unaccredited college) and in the context of the degree specialty obtained (e.g., physical education versus microbiology);

b. GREs are not required but invited, especially if the student believes that her or his GPA does not reflect true ability or potential;

c. Final selection strives to reflect a balance in diversity (minimally including rurality, ethnicity, and gender), as well as match with program mission and faculty research interests;

d. In-person interviews of the top-ranked finalists will take place before final decisions are made about admissions. Out-of-state students need to travel to Alaska for the interviews despite the expense burden this places on applicants; only in special circumstances, will arrangements be approved for phone or video-interviews; this decision is made by the Program Director(s) in consultation with the admission committee.

3. Access to Applicant Files

The Ph.D. Program Coordinators will maintain applicant files, organized alphabetically, in a designated location. File reviews will be conducted in a manner that will protect file confidentiality and smoothness of the review process. To protect confidentiality, student representatives on the admissions committee will not have access to applicant files.

4. Timeframe for Review Activities

<table>
<thead>
<tr>
<th>Date</th>
<th>Task</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prior to January 15</td>
<td>Receive applications on an ongoing basis</td>
<td>Files will be copied and organized as they are received</td>
</tr>
<tr>
<td>January 15*</td>
<td>Receipt of final applications</td>
<td>This is the currently approved application deadline; no files received after this date are reviewed</td>
</tr>
<tr>
<td>January</td>
<td>Committee starts file review</td>
<td>Coordinate with the Program Coordinator; hand rating sheets to Program Coordinator as you complete them for data entry</td>
</tr>
<tr>
<td>February 1</td>
<td>All file ratings are completed</td>
<td>Rating sheets must be with the Program Coordinator</td>
</tr>
<tr>
<td>February</td>
<td>Committee meets to make final rankings</td>
<td>This meeting requires the spreadsheet be complete and available</td>
</tr>
<tr>
<td>February</td>
<td>The Program Coordinator begins to make phone calls to interviewees</td>
<td>All interviews are in-person; only special circumstances will allow for video-conferences interviews (case-by-case); two weeks need to be allowed for interviewees to purchase plane tickets</td>
</tr>
<tr>
<td>First week in March</td>
<td>All interviewees are present for the on-site interviews</td>
<td>All faculty, not just admissions committee should participate in at least some portion of the on-site interviews;</td>
</tr>
<tr>
<td>Second week in March</td>
<td>Committee meets to begin to make final rankings</td>
<td>Preliminary acceptance and rejection decisions are made. The committee allows time at the end of the on-site interview day to collect input from all individuals who participated in the interview process. Seek input broadly and encourage participants to provide numerical ratings using the admissions form and to submit these to the program coordinator(s). After gathering as much input as possible, both verbally and through ratings forms, the Admissions Committee convenes to make preliminary admissions decisions. In attendance at this meeting will be only Admissions Committee members, Program Coordinator(s), and Program Director(s).</td>

5. Forms to be Used in the Admissions Process
   a. Screening Form (partly completed by the Program Coordinator via an Excel spreadsheet completed as applications arrive; additional ratings made by each individual admissions committee member)
   b. Comprehensive Rating Form (completed by each admissions committee member)
   c. Interview Rating Form (completed by each admissions committee members and any additional faculty members present during the in-person interviews)
   d. Student Application Form (completed by the student)
   e. Reference Rating Form (completed by each of three required references)

6. Receipt of Applicant Files
   a. The program application deadline is January 15 or the first business day after any January 15 that falls on a weekend or holiday.
   b. Student applications must be received by the posted deadline.
   c. Applications received after January 15 will not be considered as they did not meet the published admission requirement submission deadline.
   d. Applications are considered incomplete and will not be considered if not received within the above timeframes.

F. Applicants Reapplying
   1. To minimize applicants’ opportunity to have prior knowledge of the questions (particularly since such prior knowledge will likely be inconsistent across applicants); consider re-writing questions and/or adding new questions on an annual basis. To capitalize on experience in using the questions, this re-writing should strive to incorporate the prior year’s admissions committee members’ input.

V. Miscellaneous Policies

A. Written Course Feedback
   Faculty performance-based feedback to students regarding their coursework is essential for students’ academic and professional development. This written feedback should be constructive and formative and be timely enough to allow students to receive ongoing feedback about their progress toward meeting course expectations and requirements. This feedback should be detailed enough for students to understand strengths and opportunities to improve, as well as avenues for remediation in future coursework. The timeliness and comprehensiveness of the feedback should be commensurate with the nature and requirements of the coursework. Except under exceptional circumstances, feedback for all coursework should be provided to students no later than by the time final grades are submitted.

B. Assistantship Performance Feedback
   Supervisor performance-based feedback to students regarding their assistantship is essential for students’ academic and professional development. This feedback should be constructive and formative and be timely enough to allow students to receive ongoing feedback about their progress toward meeting assistantship expectations and requirements. This feedback should be detailed enough for students to understand strengths and limitations of the each area being evaluated, as well as avenues for remediation. The timeliness and comprehensiveness of the feedback should be commensurate with the nature and requirements of the assistantship. Except under exceptional circumstances, feedback for all assistantships should be provided to students no later than by the end of the assistantship term. A signed copy of each completed Assistantship Performance Review Form will be kept in each student’s graduate file.
C. Annual Student Development Review
Students are required to meet frequently with their advisor. At the end of each academic year, students will meet with their academic advisor to discuss and review their written annual professional development review. First year students will receive mid-year evaluations near the end of the Fall semester or beginning of Spring semester. This written feedback should be constructive and formative and be timely enough to allow students to receive ongoing feedback about their progress toward meeting program expectations and requirements. This feedback should be detailed enough for students to understand strengths and opportunities to improve within each area being evaluated, as well as avenues for remediation. The review will indicate whether students are making satisfactory progress towards their degree. A signed copy of each completed Annual Student Professional Development Review Form will be kept in each student’s graduate file.

D. Cultural Experience
Core Ph.D. faculty and all Ph.D. students are expected to attend the Cultural experience. Non-core psychology faculty are encouraged and invited to attend.

E. Non Program Students
Students not in the Psychology Ph.D. program may request permission from the instructor of record to register for a Ph.D. course. The instructor of record and the PD(s) will discuss the request and make a decision on a case-by-case basis. The one exception to this policy is Ph.D. courses that are stacked with UAA MS level courses in Clinical Psychology, in which case UAA Psychology MS students may register for the Ph.D. course.

F. Alcohol Policy
1. Alcohol Use during Cultural Experience and Cultural Orientation
   Because of the strong and mixed feelings about alcohol use within the Alaska Native community, all participants are expected to refrain from the use of alcohol or illicit drugs for the duration of a cultural experience or cultural orientation. This includes the entire period of time from the beginning of the event until the conclusion of the event, even if there are times when the event is not formally in session.

2. Alcohol Use during Department –Sponsored Events
   All participants are expected to refrain from the use of alcohol or illicit drugs during department-sponsored events. This expectation does not include social events. One way to distinguish department-sponsored events from social events is to determine whether the group is working from an agenda and taking minutes. If there is an agenda and minutes, the meeting is clearly a department-sponsored event.

G. Faculty Absences and Substitutions for Scheduled Classes
It is the expectation that all core, term, and adjunct faculty in the Joint Ph.D. Program provide the full measure of training and education to doctoral students in the program. To that end, it is expected that faculty absences are minimized as much as is possible. When a faculty member is unable to attend class(es), the following guidelines are to be followed:

1. It is never ideal to cancel classes, but when emergencies occur it may take some time to evaluate the situation and decide how to address it. No more than one week’s instruction should be cancelled outright without alternative arrangements for the class.

2. With the exception of official university closure (e.g., for bad weather), faculty who must miss a scheduled class for any reason are responsible for notifying the PD(s) and Department Heads(s).

3. Faculty should not simply cancel classes during their absence, but should arrange to provide students with a meaningful educational experience for each class period that he/she is absent.

4. When necessary, for prolonged faculty absences, the PD(s) and Department Heads(s) are responsible for identifying a qualified substitute instructor and working with the Dean’s office to make the appropriate hire. Typically, in emergency situations, the Department Heads(s), faculty, and administrative staff are all involved in finding a solution. Faculty and staff do not have authority to make arrangements for substitute instruction except with the approval of the PD(s) and Department Head(s). Ultimately, it is the responsibility of the Department Head(s) to determine whether a potential substitute has appropriate academic qualifications and to confer with the Dean’s office about course coverage for prolonged faculty absences.
H. Nondiscrimination Policy

In accordance with University of Alaska Board of Regent’s Policy 01.02.020 and federal and state law, this program shall not engage in illegal discrimination against any individual because of race, color, religion, national origin, age, sex, sexual orientation, gender identity, veteran status, physical or mental disability, marital status, pregnancy or parenthood. Decisions affecting individuals shall be based on the individual’s qualifications, abilities and performance, as appropriate.

http://www.alaska.edu/bor/policy-regulations/

This policy is also in accordance with the APA Ethics Code, which says: In their work-related activities, psychologists do not engage in unfair discrimination based on age, gender, gender identity, race, ethnicity, culture, national origin, religion, sexual orientation, disability, socioeconomic status, or any basis proscribed by law. http://www.apa.org/ethics/code part 3 Human Relations.
